ABOUT ME

Hello! My name is Alfian, and I am a Frontend Web Developer with approximately 5 years of work experience. I am accustomed to improving, maintaining, and refactoring code for existing web applications. I am proficient with Frontend Web Development tools such as HTML, CSS, JavaScript/TypeScript, and frameworks like ReactJS and Tailwind CSS.

I am capable of working independently as well as collaboratively within a team. Throughout my career, I have worked on a variety of projects involving end-to-end web application development, including interface slicing, API integration, and performance optimization. I have a keen eye for detail and strive to create the best user experience possible.

I am committed to continuous learning and development, staying up-to-date with the latest trends in front-end technology. I enjoy problem-solving and take pride in delivering high-quality code that enhances user experience. In my free time, I love exploring new technologies and contributing to personal projects that push the boundaries of my skills.

I am always eager to tackle new challenges and contribute to innovative and impactful projects.
